

## Seeding grass this year?

If your operation could benefit from more hay or pasture, Ducks Unlimited Canada has financial incentives that can help. Forage crops not only provide sustainable grazing sources for livestock, they're part of sound land management, diversifying crop rotations, preventing erosion and retaining nutrients.

In 2020, Ducks Unlimited Canada worked with more than 200 Saskatchewan producers to seed 23,000 acres of grass. We'd be happy to partner with you too.

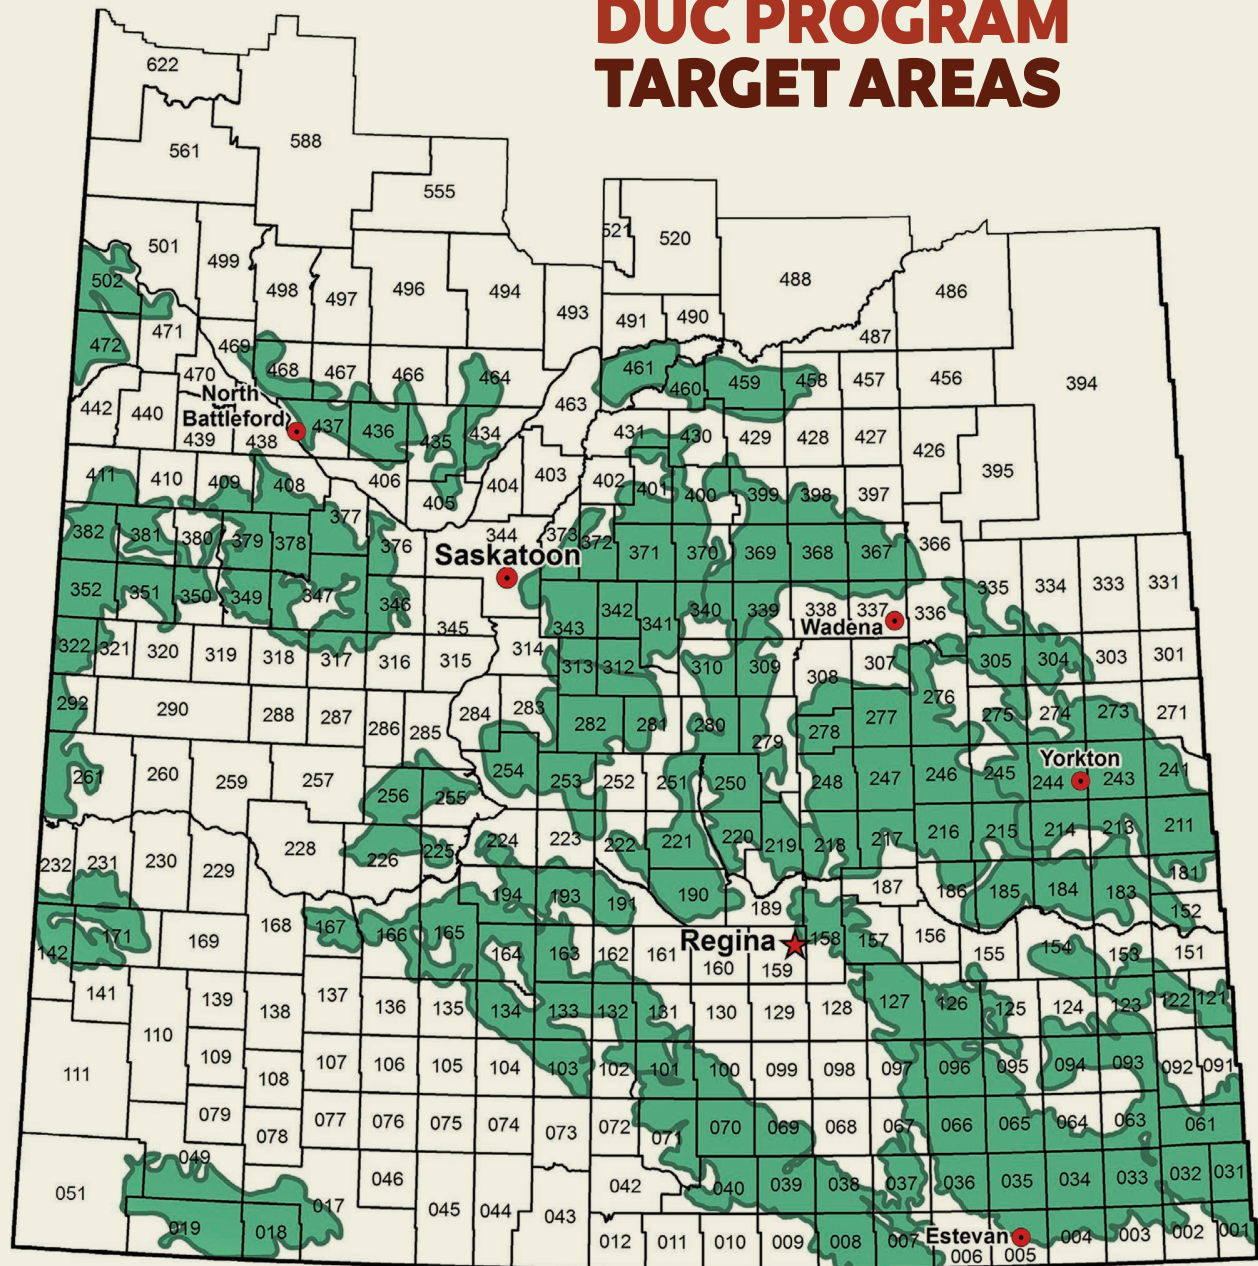

**The 2021 Forage Program pays \$35/acre toward the cost of seeding, and you may also be eligible for other program incentives.**

Questions? Call **1-866-252-3825** or email **[du\\_regina@ducks.ca](mailto:du_regina@ducks.ca)**.

*Proud to be your  
conservation  
partner.*

## DUC PROGRAM TARGET AREAS

Ready to capitalize on the benefits of perennial cover?
